

IGSuite - Integrated Groupware Suite

IGSuite is an [wikipedia:opensource] web-based suite adapted to companies that want to orient their organization towards the communication, resource and activity sharing, and complete document management. Read the [overview].

Welcome
from
IGSuite
team

This site is realized through [IGWiki] one of the IGSuite applications. This wiki collects all the documentation dedicated to the project. If you want to collaborate you can read the section "[Come contribuire|How to contribute]" where you will find all information you need. [Introduzione_a_IGSuite|Continues...]

IGSuite 3.2.1 Released

After quite a lot of work, we are proud to announce that version 3.2.1 of the IGSuite is now available. This release fixes some bugs that has been reported by users since the 3.1.8 version was released. Many thanks for the feedback we received. [http://sourceforge.net/project/showfiles.php?group_id=43928|Download Now!]

IGSuite
3.2.1
Released

PPM - Paperless Process Management

PPM, an acronym of the moment! The [Paperless Process Management|PPM] systems take care to manage business content during the normal document life cycle. IGSuite has been capable of this innovation for nearly 4 years.

PPM
Paperless
Office

In [Paperless Process Management|PPM] systems the paper documents are converted to either PDF or TIFF digital format and any existing digital documents are stored in their native format. Archiving documents in [Paperless Process Management|PPM] means you can manage them through specific flows which they assures the maximum control in terms of security and tracing. [Paperless Process Management|Continues...]

IGSuite and Ajax

IGSuite 3.2 uses [Ajax] a new web technology that significantly improves the system usability. Currently Ajax is used in the most important projects for the web present on the net. IGSuite couldn't resist such opportunity!. [Ajax|Continues...]

and Ajax!

Ecosystem S.p.A. - Case History

In our company we have been using IGSuite for at least 5 years and thanks to it we have had the possibility to enclose in a unique instrument the management of numerous organizational and relationship aspects. Our business portal <http://www.ecosystemspa.com> succeeds to link our customers with operators behind the Intranet. In this way we can offer services with high added value.
