Contribute to our project

Open Source software is a reality today and an important choice. We believe in it and we have been working on this project for years, to give you high quality software.

Financial Support

So, take this chance to participate. Financial support is important for every development effort on any business model, including Open Source. Your donation will be a financial support for us and an opportunity for you to join in our *Sponsor Program*.

What about a donation today?

Operative Support

Money is not only the unique way to contribute to our project! We can extend the Sponsor Program to company or people who contribute by jobs like: documentation translation or IGSuite dictionary translation ([how_translate_IGSuite_in_other_languages|read more]). Contact us labs@igsuite.org
